*Raising human consciousness to vitalize Earth by influencing many souls at a time.*

April 21st, 2007

Dear Senators **John McCain** and **Joseph Lieberman**, **Governors Arnold Schwarzenegger**, **Janet Napolitano**, **Governor Richardson of New Mexico** and other US States' **Governors**, **the Honorable Al Gore**, **Sir Richard Branson**, **Sir Crispin Tickell**, **James Lovelock**, **Jim Hansen** and **Tim Flannery**, **Ms. Oprah Winfrey**, **Steve Hart**, **Tom Friedman**, **Orville Schell**, and other of those members of the arts, intelligencia and political community who may be helpful,

As citizens, taxpayers and voters, *we appreciate all of you who do your important work on preserving the environment* we live in here on Planet Earth, in our country and in our State too. In fact, in Maricopa County where the city of Phoenix and its surrounding suburban developing cities are, air pollution is so bad that there, that it is now, according to an article in the Sunday Arizona Republic of April 22nd, 2007, "the second place in the country ordered to reduce course particulates – tiny suspended particles caused by combustion, fires and dust, - or lose \$1Billion in highway funds."

In Arizona, we have the lowest number of trees per capital in the nation and some of the very worse water management issues to resolve with all of our desert-river-tributaries, (now barely existent) due to long term extractive industrialization and massive dams built to re-direct river waters. Here are substantial issues in water, air and all manner of environmental sustainability issues with continuing increases in population here, people must be awakened as to how to actually resolve the serious matters of the environment. Simply because at the rate of population increases, our current environment in Arizona and elsewhere, can not support high growth without serious decline in quality of life, unless we understand and do the following:

Long before the masses or 'big politics', 'big business' or 'big entertainment' began to be awakened by scientists declaring the recent mass-publicity attacks on "Global Warming", our organization generated the primary research, contracted 'atomic-work groups' filled with remarkable people and built resilient media-communications infrastructure, to attack not just "Global Warming" but what caused it at its root source. To do this we focused primary support on the installation of a rarified high altitude up-country Outdoor Living Energies OLE! WaterRanch™ operation.

Several years in front of OLE WaterRanch!™ we established TheWoodShedAZ!™ as a high altitude, alpine desert incubator and integrated our cybernetic-powered media communications company over the top of this development for global communications of it, to the world. This story is being delivered by our Myth Culture Subscriber Engine™ online and in person through B2B IntelEnt™ Go Show BLIVE™ venue appearances to as well, deliver the EnviropionicsPermacultureAesthetics™ (EPA based H2O-absorption green zone layers, to launch the Intentional-Energy-Village™ (I.E.V.™).

The resolve was set through this process to evolve and build "S.O.S.I.E.V.™ R.D.U.™", (Sustainable-Organized-Systemic-Intentional-Energy-Villages') (Replication Delivery Units™). This is a pragmatic solution to counter acting global warming in a way that entire communities may participate now that we have organized the systemic aspect of delivering it. Now, during current expansion, we promote this culture (way of life) as a commercially traded green zone, 'EPA-compliance-grade-evergreen-footprint' to replicate world-wide. Whatever, where ever and for whomever the need for various evolving and integrative components of this "digitally architected-green-village-footprint" is, everywhere it would become needed, we knew this, so now ask yourselves *what's a genuine root solution* to "Local Urban Heat Sink Reduction and Rapid Diminishing of Global Warming"? Then ask yourself, what is my carbon footprint? Then ask yourself, how do I really balance my carbon footprint?

**BIG GREEN ANSWER\$:** First of all, catch people everywhere, anywhere, anytime and anyplace on any 'digitally compliant devices' with the *transfer of a rich menu-based choice of exchange for this dynamic linked information knowledge,(social and cultural reeducation via on line and off line OLEWaterRanch™, SOSIEV™ site systems)*. This transcendent deliverable is delivered as a professionally and scientifically based, internetworked, rich-media packaged, replicable delivery unit. The OLEWaterRanch™, SOSIEV™ RDU™, is a resolution to "Global Warming". This is required to enable people to pursue genuine reality solutions to their existing unacceptably inhumane environmental dilemmas, worldwide. This is delivered within a bold new world of exciting components that make up this Intentional Energy Village™ (I.E.V.™) for export in architectural design and construction (Cybernetic Intelligent Enviroplex™), refreshing social and cultural reeducation (Nexus Server Centers™), self-sufficiency and dynamic economics (EnviropicsPermacultureAesthetics™ (EPA, H2O-absorption compliant farms), all of which is bundled into an educationally grounded adventure touring modality. Deliver all this, as an expanding Outback to metropolitan scenic, eco touring educational, entertainment adventure, for people everywhere today and "Global Warming" recedes.

*We are escalating this today, in the form of dynamic Business to Business-Intelligence-Entertainment™ via a captivating and fluid, rich media communications interface, online and in live venues and on our development sites. We do this ([www.c3pmdhub.com](http://www.c3pmdhub.com))! GoShowBLIVE!™ at ([www.thewoodshedaz.com](http://www.thewoodshedaz.com)) or at a local venue set up by our StaffXtreme™ group. Experience this labyrinth of adventure, education and intelligence entertainment inside this new energy world.*

**"S.O.S.I.E.V.!™ R.D.U.™ The rural solution for the 'urban heat-sink'!™ and QuantumSustainability!™ against GlobalWarming!™ "**

And as well, for 'big-global-green business' everywhere now, bring the companies that can not possibly comply to newly emerging 'EPA air pollution and water absorption compliancy and generate an exchange for them to transfer a 'carbon credit trade', for the water and oxygen sequestration from SOSIEV™. And for 'big-global-green-business', where developers are 'just thinking about it', catch the principals of *all* development companies and require of them, before they start building as part of the 'permitting process', to generate an exchange from them, to transfer what they require, to come within 'EPA water absorption compliancy standards', in the form of a 'carbon credit trade' out of this foot-print;

**"S.O.S.I.E.V.!™ R.D.U.™ Exchanging the rural solution for the environment, into the 'urban heat-sink'!™"**

This is a voraciously effective solution to reversing local, regional and multi-regional S.W. – USA issues with water and air pollution in the State of Arizona and reversing the many vagaries now plaguing that State, such as "Drought-Fire-Flood cycles" that can easily lead to nasty Disease-Famine-Civil-unrest-War cycles that result from advancing "Global Warming". "Global Warming" is nothing more than a man made phenomena caused from massive removal of the life-sustaining bio-mass (*the Forests*) and ruination of the air and water (*the Hydrologic Cycle*), we breathe and drink ...by banking extractive industrial developments over many decades, worldwide. It has been mans' lust for power, money and control over nature, rather than behaving as HUmans together, in a true partnership with nature, that brought the world into the condition it is in today, a massive cauldron of "Global-Warming-Desertification" and resultant disease, famine and war" for the lack of resources that once we had in abundance everywhere. The *only solution* is two-fold; educate leadership and masses of people at once, into how to put it back and then ...go put it back. Here's how we are doing that.

Our organization ladies and gentleman, is a professionally Internet-worked-multi-divisional-broadband-consortium of highly skilled professionals, experts, scientists and entrepreneurs as accredited individuals, who built from the ground up and who own companies and not-for-profit organizations either fully established or in formation; we work together, via formal agreements, and have built the foundation for S.O.S.I.E.V.™. We invite everyone who may, to join us in this undertaking. We are 'conducting a scaled rollout' of this through organized stages, as an exemplary 'eco-friendly-replicable-high-energy-systems-EvergreenFootprint™' (the S.O.S.I.E.V.™ R.D.U.™). O.L.E.!™ To Water Ranching and Energy Village Building! To S.O.S.I.E.V.!™

*Our rich-media-interface, live-event-syndication and digitally compliant networked platform, drives big-green across the ground and across 'air, land and sea'. The dynamic, fluid-human-computer interfaces with the divisional networks that we built over the top of the real estate base, drives this foot-print as a powerful Evergreen-information-knowledge-cybernetic-banking module. Our advanced 'thin-client-rich-media-information-knowledge-signals' are exchanged universally, via credit cards or other means of digital credits, across digital networks that go everywhere into all forms of hand held or hands free digitally compliant mobile devices and into homes, businesses, governments, institutions and as direct to world leadership. Therefore, our Evergreen-platform of business 2 business intelligence, business 2 consumer marketing and consumer to business interaction through our dynamic entertainment, education and cyber-culture ...moves laterally across the world.*

And, now the platform provides any business, company, individual or organization that wishes, a high visibility banner ad presence, directly into China in Chinese. All of this is available on line for everyone today. Advertisers now make out with dynamic connectivity into China for their brands in Chinese for the Chinese. Capital contributions of a percentage of those advertising and other sponsorship, production or services and product revenues go over into the non-profit aspects of the building of the S.O.I.E.V.<sup>TM</sup>. Such as is the case for expanding OLE WaterRanch!<sup>TM</sup> biomass systems and wind, solar and green zone water management systems, into the high desert water-ranching domains, as precursory permaculture based high energy alternative-water, food and fuel zones, into to full blown primary expansion of S.O.S.I.E.V.<sup>TM</sup>.

Protecting this platform and its participants is a privilege and pleasure to be shared. We do this on line and in our special events via GOShowBLive!<sup>TM</sup> engagements and syndications which may be booked on line. The digitally encrypted, on line real time business to business intelligence that serves this endeavor and protects it all, along with the educational and entertainment content elements for this footprint, is awesome. You may refer to this on line in its working capacity at [http://www.c3pmdhub.com/b2bfd\\_digitalvault.html](http://www.c3pmdhub.com/b2bfd_digitalvault.html). We have produced a constantly growing maelstrom of highly appealing on line, off line and in-house-entertainment-educational venue content for a wide variety of on line end-users (non-paying) and as well, paying (on line purchasers) audiences worldwide. And the platform itself, because of its organic-community-based culture and iterative nature, continues to produce massive volumes of entertainment and educational content out of this matrix, on a daily basis. In fact, this new refreshing form of “intelligence-entertainment” is the lingua-franca of this platform and its culture! That’s a new powerhouse on the block, out of the multi-site-base operations of this, for ‘digitally compliant ‘safe-content-transfer’ on any digitally compliant device everywhere, whether hand held, on the wall or on your face! ... into community venues and forums everywhere. These ever-green signals go out, in the form of on site educationally-intelligent-entertaining GOShowBLive!<sup>TM</sup> VIP rider contracts to engage special events with live content’. As this platform rapidly continues to evolve watch it fly, like the very winds of change.

We suggest your campaign join ours<sup>©</sup>. You may now dramatically and effectively advertise your business or cause through our China portals direct to the Chinese in Chinese. You may dramatically and effectively and personally interface with us by booking GOShowBLive!<sup>TM</sup> special events. You may donate to The Building of the S.O.S.I.E.V.<sup>TM</sup> R.D.U.<sup>TM</sup> You may work with us at any given layers or all of those layers, to resolve “Global Warming” for good.

At [www.c3pmdhub.com](http://www.c3pmdhub.com), we navigate steerage with our “dream team from StaffXtreme<sup>TM</sup>”, for our organization, from “The 14<sup>th</sup> Gate!” You may find The 14<sup>th</sup> Gate, on line at StaffXtreme<sup>TM</sup> and from other divisions of our organization, inside **The Work** portal on line at [www.c3pmdhub.com](http://www.c3pmdhub.com), our intelligence, and logistics and media platform. Thank-you.

On the ground, this S.O.S.I.E.V.<sup>TM</sup> has been architected and designed for maximum scalability, replication and is customizable to fit any given cultural context, no matter where culture resides (ways of life on the ground) or watches entertainment media (through the air or via high speed networks) onto digitally compliant devices of all types world-wide. All the way from the sea to the highest mountain regions, we cover it all, “The Full Replacement of the Hydrologic Cycle is the end-game-solution to Global Warming and disease, famine and wars”. Therefore, shutting down progressive “Global Warming”, gets done through teaching humans how to raise themselves from the mire of disparity and lack and put themselves into a vast new world of unlimited space and resources, out onto the Bridge to the 21<sup>st</sup> Century! And into The Building of S.O.S.I.E.V.<sup>TM</sup> which generates a new energy world of abundance and prosperity. How does one get onto the Bridge to the 21<sup>st</sup> Century? Go to [www.thewoodshedaz.com](http://www.thewoodshedaz.com). Thank-you.

Regardless of anyone’s belief systems or educational and political back-grounds, the reality to accomplish the construction of this new energy world for everyone worldwide, revisits old paradigms in new innovative ways today to build communities of cooperation, collaboration, commitment and abundance everywhere. We have been doing this for almost two decades. So, today’s’ business, it gets done through *production-manufactures-credit systems* vs. the same old debt-equity systems typical banking and credit, uses to enslave people. Today’s’ business, it gets *done in support of water based economics* vs. petroleum based economics.

**BOTTOMLINE:** In our professional work with our people as individuals, joint venture partnerships and company and on sites, such as TheWoodShedAZ!<sup>TM</sup> in the high desert of Arizona’s Colorado Plateau, we are ‘woodshedding’ the Outdoor Living Energies<sup>TM</sup> (OLE!) WaterRanch!<sup>TM</sup> and scaling the installation of a completed S.O.S.I.E.V.<sup>TM</sup> R.D.U.<sup>TM</sup> Evergreen-footprint<sup>TM</sup>. While we are conducting this operation, we are fueling it with “digitally-compliant” dynamic rich-media syndications in the form of GoShowBLive<sup>TM</sup> special events and on line business 2 business, business 2 consumer and consumer 2 business exchange\$. That’s a BIG-GLOBAL-GREEN-BUSINESS-2-BUSINESS-INTELLIGENCE-ENTERTAINMENT<sup>TM</sup> PLATFORM at [www.c3pmdhub.com](http://www.c3pmdhub.com) and [www.thewoodshedaz.com](http://www.thewoodshedaz.com). Thank-you.

**DO THE ACTUAL SOLUTION:** You are welcome to join us! Book this platform via our services, production and philanthropy gateways and resolve “Global Warming” and the vagaries attached to that ugly catch word, for good.

UNIVERSAL PURPOSE: To cause the HYDROLOGIC CYCLE (*the missing and essential life sustaining 'natural-water-transport- linkage', that man kind and their industrial complex, has now predominately taken away. The Hydrologic Cycle...which causes the natural lifting of the water from the sea across the land, into the mountains and inland*), to be revitalized and put back to full functionality, thus retreating Global Warming and its related vagaries (out of control draught-fire-flood cycles) for good. The “Global Warming Neutralization Movement” or however one wishes to term it, has been evolving into most likely what will become well known very quickly, as the largest scale human group endeavor of all time, in the entire history of mankind. And, these movements, will indeed succeed if we are to survive as a species on Planet Earth at this time in the evolution of this planet. We bring you TheWoodShedAZ!<sup>TM</sup> as the OLEWaterRanch!<sup>TM</sup> delivers S.O.S.I.E.V.<sup>TM</sup>, as our part in this ‘cosmological’ human drama unfolds. Thank-you.

The full blown installation of this S.O.S.I.E.V.<sup>TM</sup> footprint is most likely, the only true pragmatic pathway to reverse Arizona’s growing need and thus potentially, the rest of the world’s need, to truly apprehend its negative water, air and tree management solutions. We have been building this in scaled stages. Therefore, we are thankful for the McCain-Lieberman **Climate Stewardship and Innovation Act** and its objective of reversing Greenhouse Gases as well as other political and scientific undertakings amassing energy against the vagaries of “Global Warming”. And we completely support all of those efforts by *the work we have done in the installation of TheWoodShedAZ!<sup>TM</sup> once again, (the incubator platform producing S.O.S.I.E.V.<sup>TM</sup>, our Outdoor Universal Renaissance<sup>TM</sup> plan of action)* and the establishment of the Outdoor Living Energies ‘O.L.E.’ WaterRanch<sup>TM</sup> platform. The web realms that we built for this at [www.c3pmdhub.com](http://www.c3pmdhub.com) and at [www.thewoodshedaz.com](http://www.thewoodshedaz.com) are the public portals through which we are implementing S.O.S.I.E.V.<sup>TM</sup> RDU<sup>TM</sup>, (Sustainable-Organized-Systemic-Intentional-Energy-Villages<sup>TM</sup> Replication Delivery Units<sup>TM</sup>).

*We anchored and underpinned this endeavor by utilizing our powerful cybernetic-electro-spectral-rich-media-syndication platform, to “Raise Earth Consciousness” into the need for S.O.S.I.E.V.<sup>TM</sup> to rapidly expand.* We are doing so at an unprecedented ... global-village-grass-roots to ivory towers intensity. At the grass roots level, we strategically partnered across the ground expert permaculture works, into the OLEWaterRanch!<sup>TM</sup> via the foundation work of founders team LUCE in venturing TheWoodShedAZ!<sup>TM</sup> with founder Thompsons’ Outdoor University Reforestation<sup>TM</sup>, as a strategic Ltd. partner. Thus, we generate N.A.R.E.X.<sup>TM</sup> at the ground level infrastructure on the OLEWaterRanch!<sup>TM</sup> and into the overall engineering of advanced permaculture, on site. NAREX<sup>TM</sup> (Northern Arizona Range Ecology Station<sup>TM</sup>), as an example, is one element of many, we have set into motion, into the high altitude desert location to build S.O.S.I.E.V.<sup>TM</sup> R.D.U.<sup>TM</sup>. Long term investment backs Outdoor Living Energies (‘OLE’) WaterRanch<sup>TM</sup> S.O.S.I.E.V.<sup>TM</sup>, has RootSourceClassrooms<sup>TM</sup> to share solutions there. So, all this is part of our community and your campaign too!

Likewise and therefore, the Outdoor Universal Renaissance<sup>TM</sup> plan of action we have established and the formation of the Outdoor Living Energies ‘OLE’ WaterRanch<sup>TM</sup> strongly supports for instance, **Al Gore’s An Inconvenient Truth**, which, as the same in all of those of you who are politicians and scientists in your work, increases understanding and gives all of us more power together, to overcome Global Warming and other related vagaries of our 21<sup>st</sup> Century ‘progress’ we call ‘the civilized world’. With incredibly powerful on line tools and major-richmedia-arts-communications syndication ability across the air, land and seas and as well, literally across the ground with optimal scalability, exemplary replication design and cross-cultural adaptability, we bring the world, through this process, onto the only true Bridge to the 21<sup>st</sup> Century to build the incredible S.O.S.I.E.V.<sup>TM</sup> R.D.U.<sup>TM</sup> foot-print. We exchange this within each continent’s dynamic cultural context and replicate S.O.S.I.E.V. for China, India, Europe, Japan, Australia, Africa and Russia. And subsequently for the undoing of “Global Warming” and the vagaries of fires-flood-draught cycles which lead to disease, famine and wars; we end all that through bringing people onto the Bridge to the 21<sup>st</sup> Century, for good!

There are no absolutes really but the following have proven reliable: Moore’s law of computing which we have taken full advantage of has worked; and so over the past 15 years, we took full advantage of this law, dramatically expanding our ability and others to dynamically transcend local geographic restrictions, *and empower ourselves to act on a local to global basis* while maintaining a low carbon footprint. Awareness tenacity and action!

We accomplished and do this feat on a daily basis with a tight integration of fluid, dynamical human-computer-interface delivery work and packaged-internet-worked rich-media syndication. This evolved from the focused deployment of extraordinary personal abilities and the subsequent emergence of this ever-green platform of advanced rich media communications to take what we do as ‘market-makers’, across the ground and into the air world-wide. On the ground pragmatic solutions to reversing serious water, air and deforestation issues which cause local disparity and add up collectively, to the “Global Warming” dilemma are engineered and being scaled through the specialists and work capability we have aggregated. Our platform has depth, reach and massive innovative capability. And, international datelines now do give our organization and those with us, an advantage with our communications, information knowledge and private networks, in various markets we are in or are making. Please enjoy [www.c3pmdhub.com](http://www.c3pmdhub.com) and [www.thewoodshedaz.com](http://www.thewoodshedaz.com). Please feel free to call us and arrange to visit with us on location, at anytime now or in the future. You may visit the OLE WaterRanch<sup>TM</sup> site at 6,000 feet elevation in the Northern Arizona high desert. And visit

as well with us in the Phoenix area partners eco-gardens of the Outdoor-University-Reforestation™, it is a major community based, grass roots “happening” not to be passed by. OLE WaterRanch™ and S.O.S.I.E.V.™, were evolved from the long term incubation work done by first layer strategic and tactical developments over seven years of time, by principal LUCE, select members of LUCE’s Atomic-workgroup members, our media-communications company and the organizations’ high altitude desert installation, TheWoodShedAZ!™ What a great endeavor to have embarked upon, which today, can not be denied by anyone.

From an ecological perspective, true enough, the sun still shines (depending on where one is standing), and yes, the earth still turns. *But, the forests that we used to fully depend on for everything ‘life giving’, no longer dependably lift the water from the oceans to the mountain tops and inland (that is the Hydrologic Cycle), to revitalize our environment.* We have dwindled our water resources, poisoned our air and wiped out our forests, to the point of having to deal with the looming disasters (from drought-fire-flood cycles) waiting to occur everywhere, *all caused by long term human generated extractive industrialization procedures (dismantlement of nature) worldwide.*

Every cycle of civilization that we as mankind have record of began with robust ecosystems, where plenty of clean air and water from balanced ecosystems gave life its daily boost because the ‘lynch-pin-key-element’, commonly termed as the Hydrologic Cycle, was functional and now, this is no longer the case. The Hydrologic Cycle today, for all practical purposes, has been broken down to the point of non-existent status in comparison to where it should be. Therefore, millions of people, animal and plant life species are dying or are going to die and it will get worse unless we fix it. Reality Check: People, animals and plants no longer have near enough sustainable life support from this Key2Life™, (the Hydrologic Cycle) because in our current internationally connected world of massive industrialization, we have destroyed the functional life giving qualities provided us from the Hydrologic Cycle being intact.

We have only one choice in resolving our water, air and deforestation issues which cause “Global Warming” and that is to simply put the Hydrologic Cycle back into full working order. We can no longer ignore this solution. It is the only solution to these issues. SO, how do we do it? The answers lie in conducting a global-human partnership with nature that works. At this point, because of the massive devastation that is occurring world-wide it is going to take all of us, to get involved to even have a chance at resolving this. A little background, access and more answers.

The higher altitude elevations that in a healthy eco-system, held the true rain and river basin forests that existed even up to fifty and sixty years ago, allowed for the discharge of ever-recharging clean water from the high mountain tops, all the way to the oceans. In the quest by mankind to obtain ill-gotten power and unhealthy doses of vast riches, the elite aspects of societies since civilizations have proliferated over time, have used various forms of slavery, and through extractive industrial activity, have managed to methodically disassemble most of the worlds’ forests and thus have created massive deserts where abundant life giving rivers used to flow. ***Please refer to the enclosed Hydrologic Cycle Charts and review this research link as a primary example of this, at [www.thewoodshedaz.com/](http://www.thewoodshedaz.com/).*** People inquire, “Why are they doing that at 6,000 feet way over there?” You now have the answer. Keep reading. Thank-you.

Since mankind *dismantled this mechanism that lifted the water* from the oceans through the forests and into the mountains and into the inland territories (*scientifically termed the Hydrologic Cycle*), thus creating massive deserts, again ***the only viable solution in the world of logic, reason, human partnerships with nature and quantum physics, is to replace the Hydrologic Cycle, fully in tact! The path to generating the results to that viable solution must be done through a well orchestrated design that is one with the nature we have left to work with. And, simultaneously, to causing the present day world societies leadership and as much of the worlds’ general population as is possible, to change the manner in which they actually think and how they actually live in order to get the job done.*** Our platform which we built has all the elements in place to resolve it.

This is no easy task and also involves converting that part of the world that lives in a place called “Suburbia” and convert that place to behaving as we do for the proliferation of those components of “S.O.S.I.E.V.™” that resolve Urban heat sink issues with the “Rural S.O.S.I.E.V.™ Solution”. This solution, is derived from current developments in our OLE WaterRanch™ operations layer, with our growing support levels and existing partners, we bring big solutions to the ‘water-table’ today. And if people do not wish to listen, then it could well come the day when Mass exodus from Suburbia may be the only alternative, into a well planned parallel universe New Energy World Society™ (N.E.W.S.!™). It’s Sustainable-Organized-Systemic-Intentional-Energy-Villages’ as a footprint to draw from, to generate the “Rural Solution toward the Urban ‘Global Warming’ Dilemma™” that gets the big picture global warming issues back under control and managed, for good.

This great intellectual accomplishment which we have basically packaged into an integrated rich-media platform and on the ground-in-the-air-solution, must be passed on and then done by vast numbers of people acting in unison, in bringing a world gone astray back in line with its destiny (which is to be one with nature and people in unity, not against nature and against each other). We must work to put the “Biomass” back. This must be done by educating and entertaining masses of people with appropriate and effective communications on this while ‘beginning with engineering

new upcountry forestlands' and thus, the Hydrologic Cycle" can evolve back into healthy condition, as it once was. This combination (*syndicated educational-entertainment-intelligence off the Replacement of the Hydrologic Cycle ground and air base, with easily adoptable solutions*), is the only solution to our "Global Warming" dilemma. It should be considered seriously by all people of influence, power, political clout and cultures of all nations, to be at this current time in history, the most single greatest peaceful employer of the 21<sup>st</sup> century and well beyond. The net benefit to all humanity, in reality, should people begin to understand this (and it is very simple), is the return, once and for all, of the much needed clean waters that must run freely, in order that all the many diverse living species to include us as the human race may survive, let alone prevail with an abundantly high quality life, of which we do not currently enjoy any longer.

We invite you to a private tour of our founding site for high-alpine-riparian enhancement and range-ecology water-ranching-works in the high desert Outback, near Flagstaff, Arizona and into other various locations such as the founding site for the Outdoor University Reforestation™ (our ground level permaculture and reforestation partners) in the Phoenix area. More and more, property owners must take the initiative, as we have done, to assemble and aggregate resources to accomplish what we can do to reverse the negative impact of local extraction-industrial development and thus negatively impact "Global Warming". And, we are rare, as we are also applying the principals of innovative high frequency media communications directly onto this troubling concern, and progressing with strategic-tactical engineering steeped within the Science of Permaculture onto the dirt floor of the desert and then syndicating arts, business, educational and entertainment off this diverse educational and entertainment content base, to the world. That is substantial. This is being done as part of the groundwork, in the Building of S.O.S.I.E.V.™ R.D.U.™, once again, a robust solution to ending "Global Warming" for good, done on a local, regional, national and international scaled deployment.

## Outdoor Universal Renaissance™ Outdoor Living Energies!™ O.L.E.!™

*OUR Outdoor Living Energies!™*

*Committed to The Design, Engineering, Installation and Replication of Sustainable-Organized-Intentional-Energy-Villages™ S.O.S.I.E.V.™; R.D.U.'s (Replication Delivery Units), Made to order, for Planet Earth and its Human Populace!*

*Building S.O.S.I.E.V.™ by raising human consciousness to vitalize Earth by influencing many souls at a time.*

### Overview

---

#### ● In-depth Description and Audience / Cost

The Outdoor Living Energies™ (OLE! WaterRanch™), provides from the start, a serene Timberlodge setting, barn and paddocks, sporting local spa and panoramic views ...for a hundred miles in all directions, on the beautiful Colorado Plateau. The Outdoor Living Energies™ (OLE! WaterRanch™), located in the Outback Alpine Desert Mountainous region of Northern Arizona's Kaibob National Forrest, began this important undertaking with TheWoodShedAZ!™ establishing years of Outdoor Living Energies™ research to incubate S.O.S.I.E.V.™ Through our strategic and tactical work and utilizing our organizations' advanced broadband rich media-syndication-hub we platform global communications, and have generated *an innovative real estate based private banking and not for profit enterprise platform. We built the intellectual property and media-communications capability to expand effective strategic reach, in accomplishing the complete, scaled build out of S.O.S.I.E.V.™ R.D.U.™.*

This is being done through aggregating privately held resources, capital and human expertise, into this unique and powerful configuration for replication worldwide, to successfully resolve local, regional, national and international environmental "Global Warming" issues for human beings, plants and animals worldwide. At 6,000 feet elevation in the high desert of Arizona, as enlightened individuals with the vision and financial capability to fund land-work projects we are now asking others to join us, in demonstrating successful water ranching research and development and implementation techniques to literally reshape how the world perceives solutions to much needed dynamic water, air and reforestation solutions. To resolve the world's current environmental Global Warming dilemma, all people must be educated to understand that

they must do those things which are important in daily living, to REPLACE THE HYDROLOGIC CYCLE. This, cycle, has been all but terminated, from the ocean to the highest mountainous regions around the world and must be put back, in order to resolve our water, air and reforestation (environmental issues), to cause "Global Warming" to retreat. We put the rich-media-syndication-communications and business-intelligence-entertainment machinery with the information knowledge and the work being done on the ground together, to show people how we can literally generate enough causality, to influence the world leadership, to generate the policy necessary, to actually put back THE HYDROLOGIC CYCLE, to a highly charged fully functioning new level of biodiversity-life-support, thus transcending from a world of disparity to a world of unlimited abundance, for all life as it used to be.

The OLE!™ WaterRanch™ is generating multiple sources of revenue to produce sums for a range of applications. It is accomplishing with its own private and as well, now extended reach into public support, continued escalation of this magnificent platform. We are building this for human beings to experience and become fully informed on, to participate into. The majority of the capitalizations we have mustered to date have been placed into materials and labor required to establish the acquisition of property, equipment and the creative and technological innovation required to create the media-communications platform for this to give it a VOICE, which we have done. We continue with that voice to escalate operations and are implementing this high desert water ranching operation at the 6,000 foot elevation zone and in other elevations simultaneously with an aggregate grass roots community movement. This approach proliferates further support, for more locations at different elevations across the State of Arizona (to show by example HOW TO PUT BACK THE HYDROLOGIC CYCLE), in regenerating life giving water and clean air zones over the top of what once was lush Colorado River Basin desert forest delta and tributary lands. These lush forested

## Outdoor Universal Renaissance™ Outdoor Living Energies!™ O.L.E.!™

OUR Outdoor Living Energies!™

*Committed to The Design, Engineering, Installation and Replication of Sustainable-Organized-Intentional-Energy-Villages™ S.O.S.I.E.V.™; R.D.U.'s (Replication Delivery Units), Made to order, for Planet Earth and its Human Populace!*

*Building S.O.S.I.E.V.™ by raising human consciousness to vitalize Earth by influencing many souls at a time.*

### Overview

---

Colorado River Tributary Delta lands, once went all the way to the ocean; thus we are in this pursuit, now literally creating “the edge of new water mapping programs in the State of Arizona over old Colorado River tributary maps”. That is a mighty prosperous occupation to conduct at this timely time in the history of the Great S.W. USA Basin.

We began by researching the validity of the volumes of water in high desert mountain regions available for water ranching and how to capture and manage this kind of water. And, there is plenty! We have planted our first seeds this past winter and in the next stages are de-compacting the hard pack soils, contouring the ranch land topography, and planting pioneer species across the entire ranch land. In other words we have reached the point where we are engineering the Permaculture zones across the landscape of the water ranch lands. Our system of *Permaculture-based-water ranching is built as a layer of necessary development*, built into a multi-tiered and replicable franchise package for export, called S.O.S.I.E.V.™ R.D.U.™, Sustainable-Organized-Systemic-Intentional-Energy-Villages™ Replication Delivery Units™. As you read about this development and learn more you will likely become familiar with other organizations that have already become engaged and are being integrated within this exemplary method of working together to resolve our local and regional environmental issues in the State of Arizona and therefore proliferate this fabulous solution to counteract devastation from the lack of management of our water, air and tree systems worldwide and therefore, substantially begin to retard “Global Warming” and other related maladies (fire-flood-draught cycles), causing (disease, famine and war), directly related to the madness of “tearing nature apart (extraction industries)” rather than “partnering with nature (water-absorption-EPA-compliancy industries)” as we should have been doing all along (ever since they began the devastation of mining too much gold, silver, copper, cotton and cattle, on the lands). Now, we have no choice but to reverse that devastation by REPLACING THE

#### HYDROLOGIC CYCLE.

How do we do it? First and foremost we must establish sophisticated broadband, global communications and media capability to get many many numbers of people to listen and to take action. We did and are doing that; and no easy task, but done and implemented as you may enjoy at [www.c3pmdhub.com](http://www.c3pmdhub.com) and [www.thewoodshedaz.com](http://www.thewoodshedaz.com). Then, we must *syndicate the message* and engage a pragmatic manner of privately banking expansion of the S.O.S.I.E.V.™ foot-print, along with all of its various sub-sets to do so, thus amassing the water based economy necessary to reverse the devastation already done by extraction based industrial complex over many decades and as well demonstrated over the demise of entire civilizations across eons of time. Have we truly evolved or will we repeat this with our current civilization? To not repeat this, we must convert from a predominantly oil based economy to a predominantly water based economy with clean air and SHOW LEADERSHIP and PEOPLE WORLDWIDE, how to proliferate environments that support life rather than destroy it, in order to survive, let alone prevail this we must do.

Therefore, we are strategically partnering with many other organizations that have various components of expertise, to plug in various key foundational aspects of this amazing undertaking, for you to see, learn of and become engaged into with our business intelligence and entertainment and educational programs as well, which we have to offer you.

Each site so managed becomes a foundation to escalate local organic energy markets on these sites and on new sites and *generate a re-charged global-culture* (a globally unified way of life) so that we as humans may survive the onslaught of our own misguided societal manner and current civilization (our ways of life on Planet Earth), whether rural or urban.

#### ● Program Description

So far, TheWoodShedAZ!™ has established many

## Outdoor Universal Renaissance™ Outdoor Living Energies!™ O.L.E.!™

*OUR Outdoor Living Energies!™*

*Committed to The Design, Engineering, Installation and Replication of Sustainable-Organized-Intentional-Energy-Villages™ S.O.S.I.E.V.™; R.D.U.'s (Replication Delivery Units), Made to order, for Planet Earth and its Human Populace!*

*Building S.O.S.I.E.V.™ by raising human consciousness to vitalize Earth by influencing many souls at a time.*

### Overview

---

relationships with resource building activity, across the State of Arizona and in using its parent company media communications platform, has established local, regional, national and international reach, to do this important undertaking. Through its strategic General-Ltd. 'for profit' partnership and engaging in its not for profit partnering programs, we have expanded private and public educational and entertainment access of the information knowledge, locations and many people involved in this Outdoor Living Energies™ (OLE!™) WaterRanch™ platform building and replication endeavor. "RootSource™" Classrooms, are therefore being instituted, in the process, across the State of Arizona. Some locations are urban and some rural and all are in support of our mission (because everyone's mission in this is the same) in this particularly GREEN aspect of our platform, by Re-engaging the Hydrologic Cycle all of us join a universal cause with no conflict, only resolve. The only way to effectively do this, is to build S.O.S.I.E.V.™ and provide a well organized platform system, to help people in all countries, replicate these customized footprints worldwide. A complete commercially viable program "for profit" has been developed and a complete "not for profit" educational curriculum in multiple divisions of the four major realms of knowledge (art, philosophy, politics and religion) which includes everything under the sun, necessary to re-hydrate our planet with S.O.S.I.E.V.™, and replicate them worldwide, is under development.

The Outdoor Living Energies™ (OLE!™) WaterRanch™ (*in formation* as a not for profit entity laid within our S.O.S.I.E.V.™ footprint) operates in Flagstaff Arizona, Coconino County, on a high desert alpine acreage known as TheWoodShedAZ!™ (which is the primary incubator for S.O.S.I.E.V.™). The OLE!™ WaterRanch™ topography serves as a RootSource™ Classroom<sup>1</sup> in our strategic joint venture "for profit" General-Ltd. Partnership

programs. The OLE!™ WaterRanch™ has been and also on a daily basis, does serve robustly, in so many ways, the support of our "not for profit" programs; fully engaging the Outdoor Universal Renaissance™ - and our ENJOY A REALIFE LEGACY TODAY!™<sup>2</sup> programs.

The surrounding land areas around the OLE! WaterRanch™ in Northern Arizona, is a volcanic mountain region that progresses from 14,000 feet in high snow zones eastward across black Cinder basins formed from dynamic pyroclastic volcanic blast zones, at 9,000 to 10,000 feet, descending rapidly, through exotic Ponderosa Pine forests; sporting adventure of all types, with spectacular high desert mountain views at every turn, visitors see across the Great Circle and Hopi and Navajo Indian canyon mesa lands, and are escorted by 4 wheeled guided Safari-wagons, directly into to the OLE! Water Ranch™ at 6,000 feet elevation. It is a pristine quiet energy vortex, where floors of glittering black-micronite sands are peppered with junipers, desert grasses, bitter brush, and sparse cacti of limited varieties. The junipers hold the only remnants of topsoil in well-spaced islands surrounded by pebble ash with some remnant grasses. This condition is the result of unrelenting timber extraction-mining and overgrazing and despite its disparate condition, it is beautiful. To envision this place with water flowing again is both imaginable and doable and necessary. There are resident bird (hummingbirds, ravens, red-tailed hawks, eagles and migrating great herons) and intermittent visits from indigenous animal life (coyotes, grand Merriam Elk, Antelope, White tailed deer and the occasional ranch land free range cattle herd) that visit across the property with the ever present population of desert squirrels, chipmunks, multicolored reptilian residents and of course, the animated jack rabbits and cottontails.

The area described above although beautiful, is

---

<sup>1</sup> A "RootSourceClassroom™" is a leading example of any ecozone, township or region which converts from a disparate desert "Flushing Design" to an abundant rainwater "Absorption Design".

---

<sup>2</sup> The *EnjoyRealife™ Live Your Legacy Today™ Program* is architected to provision citizens in carbon and into ground water sequestration by planting a part of their required trees per capita (82) on properties owned by third party land owners willing to create, establish and maintain natural forest-based biomass energy systems.

## Outdoor Universal Renaissance™ Outdoor Living Energies!™ O.L.E.!™

*OUR Outdoor Living Energies!™*

*Committed to The Design, Engineering, Installation and Replication of Sustainable-Organized-Intentional-Energy-Villages™ S.O.S.I.E.V.™; R.D.U.'s (Replication Delivery Units), Made to order, for Planet Earth and its Human Populace!*

*Building S.O.S.I.E.V.™ by raising human consciousness to vitalize Earth by influencing many souls at a time.*

### Overview

---

harshly without enough managed water resources to make it anything but being described as “the Edge of the Wild West Wilderness” and this description is becoming more and more common in the Southwest

Nearby, in Phoenix, Maricopa County is big and hot and getting bigger and hotter faster than anywhere in the nation. Fortunately for those of us who enjoy the high mountainous regions of the Northern Arizona location, a moderate average mean cool temperature of 71 degrees with fresh air and absolute silence, is the norm. A veritable undiscovered and unappreciated high desert mountain paradise of a different nature, we have worked very hard to show people how to turn this into a boon for the future preservation of the State of Arizona and proliferate our methodology, in the form of an exportable intellectual property, both “for profit” and “not for profit”, as a fully integrated cross culturally based, Sustainable-Organized-Systemic-Intentional-Energy-Village™ footprint for the world. So participate in the making of. License, absorb and replicate that! OLE! WaterRanch™ for S.O.S.I.E.V.!™ Locally and then globally! Our unique and powerful cybernetic-electro-spectral rich-media-syndication-communications engines are taking it all the way out, to every digitally compliant device that can receive the audio-visual and textural signals of this, for your world today!

The emerging Outdoor Living Energies™ (OLE!™) WaterRanch™ with its various strategic General Ltd. Partners and “not for profit” partnering programs, recommends an integrative grass roots level endowment program and *in kind* and *property trading* joint venture with TheWoodShedAZ™ (as the incubator platform it is) to initiate and maintain a long term S.O.S.I.E.V.™ location and proliferate this powerful transformation platform, worldwide. S.O.S.I.E.V.™ facilitates all of the various layers of developers expertise required, in scaled layers of installation necessary, to build completed S.O.S.I.E.V.™

The emerging Outdoor Living Energies™ (OLE!™) WaterRanch™ recommends fulfilling requests by outside

third party developers, in the alternative green zone energy building industry, for example, one of our developing strategic partners moving toward this 6,000 foot elevation water ranching application, is an educational “not for profit” entity with proven expertise in advanced Permaculture and “SolarHarvesting™”. They have bid for ground there by exchanging qualifications to establish expertise and facility at the OLE WaterRanch™, as the Outdoor University Reforestation™ (OUR™). This venture proposes that (OUR™) be remaindered with five acres of the ranch land, bequeathed in perpetuity to OUR™ Property Trust as an onsite headquarters for the further cultivation of the overall scaled S.O.S.I.E.V.™ with their unique blend of riparian zone permaculture practices, to install at ground level on the ranch, their Range Ecology Experiment Station or (REXS), as this aspect has come to be termed. These various ground level aspects that OUR™ is a candidate, to bring to the ranch, goes to venture toward nature-scaping of the entire land mass of the ranch, converting the present Flushing Design into an Absorption Design, and plant massive cover of pioneer species of forage and mixed deciduous orchards. A sequence of these initial activities is detailed in Appendix 2.

The founding of S.O.S.I.E.V.™ via professional long term incubation by the principals of TheWoodShedAZ!™ (*the first primary layer of the development of S.O.S.I.E.V.™ on the ground and in the media-communications we endeavored to provide viewers, through the air and across cyber networks globally*) began with long term in-depth back-end research and development by foundation builder, LUCE, and is a parallel pursuit of LUCE’s initial aim and effort in documenting the true epic adventure of man kinds’ anthropologically hidden parallel universe for all to see!

This largely ignored universe relates to the known and not so known socio-ecological-historical-evolution and historical ecological history of mans’ domain on the Earth and is being produced and distributed via an ongoing series

## Outdoor Universal Renaissance™ Outdoor Living Energies!™ O.L.E.!™

*OUR Outdoor Living Energies!™*

*Building S.O.S.I.E.V.™ by raising human consciousness to vitalize Earth by influencing many souls at a time.*

### Overview

---

of unique rich-media-syndications and labyrinthine-digitally-compliant, and visually appealing media-communications product (both live and on line and into digitally compliant devices of all types on a world wide scale); with such content-deliveries, entitled **The Trilogy of the BlackRose™, Citadel of Highly Evolved Being** as we unravel the undiscovered 'global matrix of the unknown parallel universe' in this great game of *RealLife!™* in 'Aladdin's Cave'. We become to truly know of our place in space this Earth, which holds and transports humanity through the space-time continuum©. We also welcome and facilitate other professionally proficient and pragmatic content developers who understand "the \$upply Side", to work with us on "NewParadigmShift-Content™".

Through the cooperative efforts of those dedicated visionaries who founded this platform over the past 15 years of time you now may also share in this, a new reality on Planet Earth worth engaging into as part of.

Thanks is being accepted and support is being generated; forthcoming in copious quantity, for those who saw this vision before them and took it in and activated it now sharing a place for all others to realize this prosperity for themselves and all they know who are with them and who come in future generations. Now, entire atomic workgroup teams of other professionals in many varied occupations and modalities, are realizing their talents and spending their time and putting their resources toward Replacing the Hydrologic Cycle by Building S.O.S.I.E.V.™ to replicate locally, regionally, nationally and worldwide; therefore replenishing our lands everywhere with newly charging artesian wells, river systems and aquifers, and resuscitating our environments with living food and safe fuel and transportation systems.

By bringing the many varied aspects of this subject matter in dynamic formats through our own rich-media-syndication platform ([www.c3pmdhub.com](http://www.c3pmdhub.com)) we give businesses access through our own live show box special events venues, out of "The 14<sup>th</sup> Gate", on our platform, we

have gone "GoShowBLIVE!™ with our rich and dynamic high frequency communications signals across the worlds Internetworked switches and wirelessly, digitally compliant devices, thus we insure the healthy commercial scale monetization of our future and yours! *By building S.O.S.I.E.V. and exporting this footprint everywhere to fit any given locality of culture (ways of life), we truly are enabled, to do our part to restore the Earth's balance and vitality, we bring dignity and respect to 'community'. OLE! WaterRanch!™ Cheers S.O.S.I.E.V.!™*

#### ● Rationale

In the pristine natural world aspect of the historic past, during eras of non-invasive intrusion on nature's eco-systems, vast regions were heavily forested with little man made influence from over extraction of raw resources (minerals, animals and trees, etc.) and of course next to none or no run-off occurred. Therefore the organic nature of the firm and vibrant ground in soils did not impede waters (streams and rivers) from flowing. Now, through over extraction and over development, mans' influence has caused the strip-mining of entire areas and resulted in massive deserts that lack these life sustaining characteristics. It has become so prevalent and the net result is so dangerous that man kind as a whole, must move as a whole, to intervene and replace what is now missing, and rejuvenate a fully functional water-lifting mechanism, to move natural water across the land from the sea and across the land and into the mountains again. *The only way to do this is to replace the hydrological cycle and the only way to actually do that is to build engineered forest lands, into the upper elevation regions of the country that can sustain vast quantities of water to move down stream into tributaries, reservoirs, wells and aquifers to recharge our environments with recharging fresh water and clean air; thereby convert our rainwater (be it from regular weather patterns or from monsoons) into genuine reforestation (not tree farms) and organic edible landscaped growth—in short, to create massive upcountry structured water storage, thus OLE! WaterRanching™, and The Building of SOSIEV™ RDU™, to assist massive forest regeneration to Put Back the Hydrologic Cycle into full operations!* So, in order to accomplish this, as previously emphasized and demonstrated, we have built dynamic rich-media-

### **Overview**

---

communications-syndication machinery that is not dependent on known mainstream networks to communicate and reciprocate to the public for the public, with cross cultural communications interfaces world wide in many languages. We share our vision, integrity and our strengths and we do enjoyable business with mainstream media but we are autonomous, as well. Thank-you.

1. It is proven through in-depth research that our own industrial development of the Great SW Basin (SW USA) intentionally dismantled the mineral and soil based resources (silver, gold, copper) through greed based mining operations and subsequently destroyed the S.W. tributaries based water and virgin forest systems of the Colorado River Basin.

2. All of this was accomplished by banking extraction industries over the past sixty years, resulting in the mess we have today, over industrialized disparity and lack of life giving water and clean air systems with the least amount of trees per capita in the United States (6 trees per person) in the State of Arizona.

2. Increased temperatures, according to our on the ground and in the air research on properties, shows that in the Phoenix region, the differential between Phoenix temperatures and Flagstaff (higher elevation) temperatures has doubled in the past 36 months from a 14 to 15 degree differential to a 25 to 30 degree differential. According to research as well, conducted by "OUR™" this has profound implications for dynamics of the urban ecosystem." [Baker & Brazel, et al, 2003]. Wide asphalt roads become 150° heater bands in heat island cities.

2. We know that this means that our environment in Arizona State lacks enough organic plant and vegetable life, to maintain the human population in the state of Arizona. And, the animals go with us, as well.

3. As early as 1934 when they built the Hoover Dam and diverted the water flow of the mighty Colorado River, the naturalist – explorer Leopold observed the great river and its tributaries and said, "The River is everywhere and anywhere". (Refer to our 'Sonoran Desert Research' taken from the Sonoran Desert Library of research on this

subject matter).

4. In the 15<sup>th</sup> century, Arizona was so abundant with water tributaries and forest lands, that it supported the occurrence of grizzly bears.

4. The Arizona great S.W. basin forests contained enough timber to build the Spanish armada and they raped the forests for the wood and the resources it took to do so.

5. According to "OUR™" research, in 2000, there were 8842 people employed to cut down trees, shrubs, and bushes in Maricopa County alone; clear cutting by corporate development is rampant.

6. According to reports done by scientists, the world-wide ambient oxygen levels decreased by more than 50% in the past 200 years. That is down from 38% to 17%! Pollution lowers these rates to the point of becoming "genocidal" in its impact; cancer occurs at 13%, and death at 9%. And, we wonder why "Dis-ease" is on the rise everywhere?!

6. It is a well known fact that the temperatures in Phoenix' famous "Valley of the Sun" have increased to the point of killing people, in alarmingly increased numbers in the hot summer months and the State of Arizona's economic tourism industry last summer was drastically damaged by wild fires run rampant from Flagstaff to Sedona and across the state sometimes with over 20 fires burning out of control at once. Phoenix's present increase of 1.12°F far exceeds the global rate of 0.021-0.131°F/yr.

7. What are the temperature like based on the heat sink effect caused by a lack of water, fresh air and tree zones? FACTS: Phoenix weather reports an air temperature of 110°F, the tarmac reads 150°, concrete 138°, and shaded southern eaves 127°. In 2005 the continued day to day, daily highs were in the teens and minimum nightly lows of 96°, did not cool off at night as usual. The death rates increased radically.

8. Statistically, these changes in temperature in the Phoenix metropolitan areas resulted in the heat-related deaths of 31 people during the month of July 2005, 21 in a single week alone.

9. And while in the same week as those 21 deaths, a

*Building S.O.S.I.E.V.™ by raising human consciousness to vitalize Earth by influencing many souls at a time.*

### **Overview**

---

single Phoenix developer cut down 340 mature, healthy trees!

10. (HOA's) or home owners associations in Arizona sternly limit residential application of energy-saving equipment and alternative energy creating methods of living and green-zone lifestyle advancement.

11. The US requirement to offset current US fossil fuel emissions is 82 mature trees *per capita*. In Arizona, we only have 6 trees per capita on the average.

12. A well engineered, "EPA Absorption-compliant" Arizona plot that is designed to "Balance its Carbon Footprint" can be one of only 30 feet square and it still can easily achieve an ambient temperature reduction of up to 80°F, and retain 3000 gallons of water while realizing 26% oxygen; thereby lessening human misery, through the

disastrous repetitive cycles of fires from draughts, nasty and devastating mud-slides and floods from erosion, increasingly alarming rates of pollution and disease, all of which leads to disparity, famine, struggle and eventually, outright war for the struggle to survive over a lack of resources due to the ignorant perpetration of extractive industries need for money and power to dominate and call this "socio-economic progress".

13. We have become a generation of humans that now are for the most part, dependent on the first couple of feet of the ocean and what is left of now wiped out rainforests of by gone civilizations, for the production of our oxygen.
