

Citizen's Petition to the Honorable Jon Kyl

From: Prof. Daniel Thompson, Gilbert

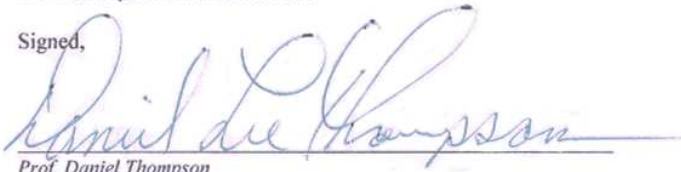

WHEREAS ... Global warming is one of the most pressing environmental problems of our time; and

WHEREAS ... Carbon dioxide and other greenhouse gases released by fossil fuel consumption, deforestation and other human activities can trap heat in our atmosphere for 100 years or longer, with devastating environmental consequences; and

WHEREAS ... The current U.S. policy on global warming has been one of indifference, out of step with world opinion, at a time when our damaging global warming pollution is continuing to increase.

THEREFORE ... I urge you to support legislation to cap and reduce global warming pollution nationwide and join your colleagues Senators John McCain and Joseph Lieberman as co-sponsors of the bipartisan Climate Stewardship and Innovation Act.

Signed,

A handwritten signature in blue ink that reads "Daniel Thompson". The signature is fluid and cursive, with the first name "Daniel" and last name "Thompson" clearly legible.

Prof. Daniel Thompson
